47. Welcome, dashboard and directory at phone width		49
---	--	----

Welcome page

Used by: Everyone

The front door of the platform. It welcomes visitors, shows the DSN brand and sends each type of visitor to the right place.

- Find talent opens the public directory
- Join as a member opens the application form
- Three doors for Members, Reviewers and Partners
- Live counts of members, verified roles and hiring partners
- Meet the talent: the three top-rated profiles
- In test mode, a link to one-click test access

The screenshot shows the 'Talent Platform' interface. At the top, there's a navigation bar with 'Home' (active), 'Find talent', 'Join', and 'Partners'. On the right, there are links for 'Admin', 'Log in', and an 'Apply' button. The main header features the 'DATA SCIENCE NIGERIA' logo and a large 'Welcome to the DSN Talent Platform' title. Below the title, it says 'Verified data and AI talent from the Data Science Nigeria community.' and provides three main action buttons: 'Find talent' (green), 'Join as a member' (dark blue), and 'Log in' (light blue). A yellow banner offers 'Testing the platform? Use one-click test access →'. The middle section has three colored cards: 'Members' (green) with 'Build your profile and get verified.' and 'Apply →'; 'Reviewers' (dark blue) with 'Rate and verify DSN talent.' and 'Reviewer log in →'; and 'Partners' (red) with 'Hire through DSN.' and 'Get access →'. Below these cards are three statistics: '6 Members', '4 Verified roles', and '2 Hiring partners'. The 'Meet the talent' section displays three profile cards. Each card shows a user ID, a rating in a green circle, a job title, and a 'claimed' status with a progress bar. The first card is for a Data Scientist (rating 80), the second for a Machine Learning Engineer (rating 68), and the third for a Business Analyst (rating 64). A 'See all' button is in the top right of this section.

Reviewed by DSN on 20 Jun 2026. Each category is scored out of 20 against a published rubric.

WHAT THE CATEGORIES MEAN

Technical Expertise.

Works independently; answers practical questions correctly and solves typical problems in the role. scores 11–15.

Projects & Quality of Work.

5+ relevant projects on real data with a clear personal contribution and working links or code. scores 11–15.

Work Experience.

3–5 years delivering work independently in relevant roles. scores 11–15.

Education & Certifications.

A relevant degree plus several recognised certifications or DSN programme completions. scores 11–15.

Professional & Soft Skills.

Clear communicator, reliable, collaborates well and owns tasks. scores 11–15.

ROLE MANUAL

Roles and levels

Reviewers verify each role against these descriptions.

These are starter descriptions. DSN replaces them with the official role manual.

Levels in general

Junior Delivers well-defined tasks with guidance. Usually 0–2 years of relevant practice.

Mid-Level Delivers standard work independently from start to finish. Usually 2–5 years.

Senior Owns complex, unclear problems, chooses the approach and mentors others. Usually 5+ years.

Lead / Expert Sets direction for a team or practice, with recognised expertise and clear impact across an organisation.

Data Analyst

Turns data into answers and reports that help teams decide.

Junior Cleans data, writes basic SQL and builds simple charts and reports from clear instructions.

Mid-Level Owns recurring reports and dashboards, writes solid SQL, frames questions with stakeholders.

Senior Leads analyses that change decisions, sets reporting standards, reviews others' work.

Lead / Expert Runs an analytics function, sets metrics strategy and advises leadership.

BI Analyst / BI Developer

Builds and maintains dashboards, semantic models and reporting systems.

Junior Builds dashboards in Power BI/Tableau from existing datasets.

Mid-Level Designs data models and measures, automates refreshes, manages workspace access.

Senior Owns the BI platform design, performance and governance across departments.

Lead / Expert Sets BI strategy and standards for the organisation and leads a BI team.

Business Analyst

Connects business needs to data and systems through requirements and process analysis.

Junior Documents requirements and processes with guidance; supports testing.

Mid-Level Runs requirement sessions, maps processes, writes user stories and acceptance criteria.

Senior Shapes solutions for complex programmes and manages senior stakeholders.

Lead / Expert Leads business analysis practice and portfolio-level change.

Data Scientist

Builds statistical and machine learning models to predict, explain and optimise.

Junior Trains standard models on prepared data and reports metrics correctly.

Mid-Level Frames problems, engineers features, validates models properly and explains results to business users.

Senior Owns models in production with measurable impact; chooses methods for hard problems; mentors.

Lead / Expert Sets data science direction, leads teams and delivers organisation-wide outcomes.

Data Engineer

Builds reliable pipelines and storage that move and prepare data.

Junior Writes and maintains simple ETL jobs and SQL transformations.

Mid-Level Designs batch/stream pipelines, orchestration and data quality checks.

Senior Architects data platforms for scale, cost and reliability; reviews designs.

Lead / Expert Owns data platform strategy and leads engineering teams.

Analytics Engineer

Models clean, tested, documented data for analysis (e.g. dbt).

Junior Builds simple models and tests from specs.

Mid-Level Designs dimensional models, testing and documentation for a domain.

Senior Owns the modelling layer and metric definitions across domains.

Lead / Expert Sets modelling standards and leads the analytics engineering function.

Machine Learning Engineer

Puts ML models into reliable production systems.

Junior Packages and serves models with guidance; writes tests.

Mid-Level Builds training and serving pipelines, monitors models in production.

Senior Designs ML systems for scale and latency; leads technical decisions.

Lead / Expert Sets ML engineering architecture and leads teams.

AI Engineer

Builds applications powered by AI models and APIs.

Junior Integrates AI APIs into simple features.

Mid-Level Builds complete AI features with evaluation, guardrails and monitoring.

Senior Designs AI systems end to end and owns quality, cost and safety.

Lead / Expert Sets AI product architecture and leads engineering teams.

Generative AI Engineer

Builds with large language and generative models: prompting, retrieval, fine-tuning.

Junior Builds prompt-based prototypes and basic retrieval (RAG).

Mid-Level Ships RAG/agent features with evaluation sets and safety checks.

Senior Fine-tunes or adapts models, designs evaluation and deployment at scale.

Lead / Expert Leads GenAI strategy and teams; recognised expertise.

MLOps Engineer

Runs the infrastructure and processes that keep ML reliable.

Junior Maintains CI/CD and model registries with guidance.

Mid-Level Builds automated training, deployment and monitoring pipelines.

Senior Designs the MLOps platform, reliability and governance.

Lead / Expert Sets MLOps strategy across teams.

AI Product Specialist / Manager

Defines AI products people need and guides them to launch.

Junior Supports discovery, writes specs and tracks delivery.

Mid-Level Owns an AI feature from discovery to launch with clear success metrics.

Senior Owns an AI product line, roadmap and responsible-AI decisions.

Lead / Expert Sets AI product strategy for the organisation.

Data / AI Solutions Architect

Designs end-to-end data and AI solutions for clients or organisations.

Junior Documents architectures and supports solution design.

Mid-Level Designs solutions for single projects and estimates effort and cost.

Senior Designs complex multi-system solutions and leads client technical engagements.

Lead / Expert Sets reference architectures and advises executives.

AI Researcher

Advances methods through experiments and publications.

Junior Reproduces papers and runs experiments under supervision.

Mid-Level Designs original experiments and co-authors papers.

Senior Leads research agendas with first-author work at recognised venues.

Lead / Expert Leads a research group with sustained, cited contributions.

Data Annotator / AI Trainer

Labels data and evaluates model outputs to train AI.

Junior Labels data accurately following guidelines.

Mid-Level Handles complex tasks, reviews others' labels and flags guideline gaps.

Senior Writes guidelines, runs quality assurance and trains annotators.

Lead / Expert Leads annotation programmes and data quality strategy.

AI Educator / Trainer

Teaches data and AI skills to learners.

Add a claimed role

Used by: Member

Adds a role the member wants to be known for. It shows as Claimed, not verified until a reviewer decides. The role manual text for each level appears as they choose.

- Pick role and level
- Add role
- Read what DSN expects at each level

The screenshot shows the 'Add a claimed role' modal in the DSN Talent Platform. The modal is centered and has a white background with a light gray border. It contains the following elements:

- Header:** 'Add a claimed role' in bold.
- Text:** 'It shows as "Claimed - not verified" until a reviewer verifies it. You can add several roles and request verification for all of them together.'
- Table:** A table with 2 columns: Role and Description. The roles listed are Junior, Mid-Level, Senior, and Lead / Expert. The descriptions are: Junior (Trains standard models on prepared data and reports metrics correctly.), Mid-Level (Frames problems, engineers features, validates models properly and explains results to business users.), Senior (Owns models in production with measurable impact; chooses methods for hard problems; mentors.), and Lead / Expert (Sets data science direction, leads teams and delivers organisation-wide outcomes.).
- Form:** Two dropdown menus labeled 'Role *' and 'Your level *'. The 'Role *' dropdown is currently set to 'Data Scientist' and the 'Your level *' dropdown is currently set to 'Junior'.
- Buttons:** 'Add role' (green) and 'Cancel' (gray).

The background of the screenshot shows the user's profile page with a DSN Rating of 53/100, a 'Reviewed' badge, and a list of roles including 'Data Analyst' (verified) and 'BI Analyst / BI Developer' (claimed - not verified - Junior). The footer of the page reads '© Data Science Nigeria · DSN Talent Platform' and 'Test mode · Test data is saved in this browser only'.

Request role verification (several roles)

Used by: Member

One request can cover several roles. The member ticks the roles, picks a level for each and follows the steps to email their evidence.

- Tick any claimed roles; verified roles can be ticked to request an upgrade
- Roles already under review are greyed out
- Copy the verification email address and subject line
- See the documents to attach
- Confirm the email was sent, then submit

ROLE VERIFICATION

Request role verification

Choose the roles to verify Read the role guide

☐ Data Analyst Verified Junior · request an upgrade	Mid-Level
☐ BI Analyst / BI Developer Already under review	Junior
☒ Data Scientist Claimed · not verified	Junior

Pick the level you believe you're at. The reviewer checks each role against DSN's role manual and may confirm it, change the role or level, or not verify it.

- Email your documents to**
verification@your-dsn-domain.org Copy
- Use this subject line**
Role Verification - DSN-2024-0187 Copy
- Attach these documents for each role**
 - Updated CV (PDF)
 - Employment letter, contract or reference for the role you are claiming
 - 2-3 work samples or project links that show the role in practice
 - Any certificate relevant to the role
- Confirm below.** One reviewer handles all the roles in this request.

Use the subject line shown, attach everything in one email, and keep files under 10MB. A reviewer will check your documents within 10 working days. They may ask you for a short online interview before giving a result.

Submit profile for rating

Used by: Member

Sends the profile for a five-category rating review, with the email steps and document list.

- Copy email and subject line
- Confirm and submit
- See required documents

The screenshot displays the 'Talent Platform' Member Dashboard for a user named Tunde Bakare. The dashboard shows a DSN Rating of 53/100 and a 'Verify your claimed roles' next step. A modal titled 'RATING REVIEW Submit your profile for rating' is open, providing instructions and a checklist for submitting documents for review. The modal includes steps for emailing documents, using a subject line, attaching documents, and confirming the submission. A 'Submit request' button is visible at the bottom of the modal.

RATING REVIEW
Submit your profile for rating

A reviewer will grade your CV and documents in five categories out of 20. They may invite you to a short online interview first.

- 1 Email your documents to**
verification@your-dsn-domain.org [Copy](#)
- 2 Use this subject line**
Rating Review - DSN-2024-0187 [Copy](#)
- 3 Attach these documents**
 - Updated CV (PDF)
 - Certificates and transcripts (education and professional)
 - Links to your best projects (GitHub, Kaggle, dashboards, reports)
 - Employment letters or references for past roles
- 4 Confirm below.** A reviewer grades you against the rubric and may ask for an interview.

Use the subject line shown, attach everything in one email, and keep files under 10MB. A reviewer will check your documents within 10 working days. They may ask you for a short online interview before giving a result.

☐ I've sent the email with my documents.

ROLE MANUAL

Roles and levels

Reviewers verify each role against these descriptions.

These are starter descriptions. DSN replaces them with the official role manual.

Levels in general

Junior	Delivers well-defined tasks with guidance. Usually 0–2 years of relevant practice.
Mid-Level	Delivers standard work independently from start to finish. Usually 2–5 years.
Senior	Owns complex, unclear problems, chooses the approach and mentors others. Usually 5+ years.
Lead / Expert	Sets direction for a team or practice, with recognised expertise and clear impact across an organisation.

Data Analyst

Turns data into answers and reports that help teams decide.

Junior	Cleans data, writes basic SQL and builds simple charts and reports from clear instructions.
Mid-Level	Owns recurring reports and dashboards, writes solid SQL, frames questions with stakeholders.
Senior	Leads analyses that change decisions, sets reporting standards, reviews others' work.
Lead / Expert	Runs an analytics function, sets metrics strategy and advises leadership.

BI Analyst / BI Developer

Builds and maintains dashboards, semantic models and reporting systems.

Junior	Builds dashboards in Power BI/Tableau from existing datasets.
Mid-Level	Designs data models and measures, automates refreshes, manages workspace access.
Senior	Owns the BI platform design, performance and governance across departments.
Lead / Expert	Sets BI strategy and standards for the organisation and leads a BI team.

Business Analyst

Connects business needs to data and systems through requirements and process analysis.

Junior	Documents requirements and processes with guidance; supports testing.
Mid-Level	Runs requirement sessions, maps processes, writes user stories and acceptance criteria.
Senior	Shapes solutions for complex programmes and manages senior stakeholders.
Lead / Expert	Leads business analysis practice and portfolio-level change.

Data Scientist

Builds statistical and machine learning models to predict, explain and optimise.

Junior	Trains standard models on prepared data and reports metrics correctly.
Mid-Level	Frames problems, engineers features, validates models properly and explains results to business users.
Senior	Owns models in production with measurable impact; chooses methods for hard problems; mentors.
Lead / Expert	Sets data science direction, leads teams and delivers organisation-wide outcomes.

Data Engineer

Builds reliable pipelines and storage that move and prepare data.

Junior	Writes and maintains simple ETL jobs and SQL transformations.
Mid-Level	Designs batch/stream pipelines, orchestration and data quality checks.
Senior	Architects data platforms for scale, cost and reliability; reviews designs.
Lead / Expert	Owns data platform strategy and leads engineering teams.

Analytics Engineer

Models clean, tested, documented data for analysis (e.g. dbt).

Junior	Builds simple models and tests from specs.
Mid-Level	Designs dimensional models, testing and documentation for a domain.
Senior	Owns the modelling layer and metric definitions across domains.
Lead / Expert	Sets modelling standards and leads the analytics engineering function.

Machine Learning Engineer

Puts ML models into reliable production systems.

Junior	Package and serves models with guidance; writes tests.
Mid-Level	Builds training and serving pipelines, monitors models in production.
Senior	Designs ML systems for scale and latency; leads technical decisions.
Lead / Expert	Sets ML engineering architecture and leads teams.

AI Engineer

Builds applications powered by AI models and APIs.

Junior	Integrates AI APIs into simple features.
Mid-Level	Builds complete AI features with evaluation, guardrails and monitoring.
Senior	Designs AI systems end to end and owns quality, cost and safety.
Lead / Expert	Sets AI product architecture and leads engineering teams.

Generative AI Engineer

Builds with large language and generative models: prompting, retrieval, fine-tuning.

Junior	Builds prompt-based prototypes and basic retrieval (RAG).
Mid-Level	Ships RAG/agent features with evaluation sets and safety checks.
Senior	Fine-tunes or adapts models, designs evaluation and deployment at scale.
Lead / Expert	Leads GenAI strategy and teams; recognised expertise.

MLOps Engineer

Runs the infrastructure and processes that keep ML reliable.

Junior	Maintains CI/CD and model registries with guidance.
Mid-Level	Builds automated training, deployment and monitoring pipelines.
Senior	Designs the MLOps platform, reliability and governance.
Lead / Expert	Sets MLOps strategy across teams.

AI Product Specialist / Manager

Defines AI products people need and guides them to launch.

Data / AI Solutions Architect

Designs end-to-end data and AI solutions for clients or organisations.

Rating rubric

Five categories × 20 points = DSN Rating out of 100. New profiles start at 5 per category.

Technical Expertise /20

0-5 Not yet assessed, or only basic awareness of the tools used in the role.

6-10 Uses core tools with guidance; handles simple, well-defined tasks.

11-15 Works independently; answers practical questions correctly and solves typical problems in the role.

16-20 Deep expertise; handles complex, ambiguous problems and explains trade-offs clearly in interview.

Projects & Quality of Work /20

0-5 No projects yet, or only tutorial and course exercises.

6-10 2-4 relevant projects with basic documentation or links.

11-15 5+ relevant projects on real data with a clear personal contribution and working links or code.

16-20 Complex, deployed or real-world projects with measurable impact and verified ownership.

Work Experience /20

0-5 No relevant work yet, or internship and volunteer work only.

6-10 Up to 2 years in an entry-level or junior role.

11-15 3-5 years delivering work independently in relevant roles.

16-20 6+ years with senior or lead responsibility and clear outcomes.

Education & Certifications /20

0-5 No relevant qualification or certificate yet.

6-10 A degree or diploma, or 1-2 recognised certificates (DSN programmes count).

11-15 A relevant degree plus several recognised certifications or DSN programme completions.

16-20 Postgraduate study in a relevant field plus advanced professional certifications or awards.

Professional & Soft Skills /20

0-5 Not yet assessed.

6-10 Communicates adequately; needs support to structure work.

11-15 Clear communicator, reliable, collaborates well and owns tasks.

16-20 Client-ready; structured thinking, leads others and presents confidently to stakeholders.

Role levels

Junior Delivers defined tasks with guidance.

Mid Delivers standard work independently.

Senior Owns complex work and guides others.

Lead Sets direction, leads teams, recognised expertise.

- Description of the work
- Send to DSN

The screenshot displays the 'Request talent' modal form on the DSN Talent Platform. The background shows a profile for Tunde Bakare (DSN-2024-0187) with a 'Data Analyst' role and various skills. The modal form is titled 'REQUEST TALENT THROUGH DSN' and 'Request DSN-2024-0187'. It includes a note: 'DSN reviews every request, checks availability with members and shares a shortlist.' The form fields are as follows:

- Role needed ***: Dropdown menu with 'Data Analyst' selected.
- Level**: Dropdown menu with 'Junior' selected.
- How many people**: Input field with '1'.
- Engagement type ***: Dropdown menu with 'Select...' selected.
- Work mode**: Dropdown menu with 'Select...' selected.
- Start date or duration**: Input field with 'e.g. Start Nov, 6 months'.
- Budget range (optional)**: Input field with 'e.g. ₦400k-₦550k / month'.
- Describe the work ***: Text area for describing the work.

At the bottom of the modal, there are two buttons: 'Send request to DSN' (green) and 'Cancel' (grey).

Add a peer reviewer

Used by: DSN admin

Creates a reviewer account (RV-xxx). The reviewer sets their own password at first log-in.

- Name, email, expertise
- Permissions

The screenshot shows the 'Add a peer reviewer' modal form overlaid on the 'Peer reviewers' management page. The background page has a top navigation bar with links: Overview, Applications, Members, Verifications, Reviewers (active), Recruiters, and Partner requests. Below this is a sub-navigation bar with Impact, Role manual, and Settings. A red banner indicates 'Admin mode - You can see real identities and every record.' The main content area is titled 'Peer reviewers' with a subtitle 'Role verifiers approve or change claimed roles. Rating reviewers grade credentials and can interview.' and an 'Add reviewer' button. A table lists existing reviewers with columns: ID, NAME, EXPERTISE, CAN VERIFY ROLES, CAN RATE PROFILES, COMPLETED, and STATUS. The modal form contains the following fields and options:

- Full name ***: Text input field.
- Email ***: Text input field with a note 'They confirm this when creating a password'.
- Expertise**: Text input field with a placeholder 'e.g. Data engineering, analytics'.
- Permissions**: Two checkboxes: ☒ Can verify roles and ☐ Can rate profiles (credentials & interviews).
- Buttons**: 'Create reviewer' (green) and 'Cancel'.

At the bottom of the page, there is a footer with '© Data Science Nigeria · DSN Talent Platform' on the left and 'Test mode · Test data is saved in this browser only' on the right.
